

Curriculum & Instruction	Facilities	Learning Environment / Mental Wellness / Behavior Supports	Community Involvement	Technology	General Comments
make homework meaningful, not just worksheets	keep the school safe structurally. we have a beautiful campus with plenty of room for kids to run and play.	Student wellness/fitness	Activities	The ability to have packets/curriculum electronically accessible. Printing packets is a waste of money and time!	Great school!
Consistent ELA curriculum for grades K-5	Make the sidewalk by the activity room functional for the winter and rest of the year.	Aide time for students who need a one on one.	The Janesville School website doesn't seem to be enough when posting about important school related meetings. Maybe using the all-call system or another form of social media that administration oversees.	Smart boards for all classrooms	the school isn't a prison so stop treating kids like there criminals
Having a good mix of academic level per classroom instead of 1 class of advanced and another class of behind	Why can't Janesville families pull together and donate their time, and maybe donate some paint or materials to help get bathroom stalls painted? We would gladly volunteer and help buy some paint.	Develop a system for working off bad behavior	helping kids feel as if they are a part of a community, maybe through service projects	Access to needed devices/technology for teachers	monthly lice check for elementary students to be brought back into the school
We need a writing curriculum. The math curriculum does not prepare the kids for state testing	stop delaying important repairs on our school, if its a beautiful place people will come	Not a school issue	How do we make Janesville the most desired school in the community?	teaching students to be critical thinkers of information they can get to via internet technology, providing instruction for accessibility settings for general and testing use	Our success on keeping students caught up (or catching them up) from covid related absences can only happen if class sizes are small and with no combo-graded levels.
staff development and cohesiveness, focus on complete history and addressing marginalized groups	bathrooms are gross	Janesville needs to be aware of and address the needs of its changing demographics. Also, picking 3-5 simple playground rules and managing those would be much better than the huge list that is currently published. Ease up on all the "infractions" and make it simpler for the kids.	The community could use an open gym time.	In a technology driven world, how are students prepared to learn technology and what opportunities do they have for coding and such beyond basic typing programs that are built into the curriculum for access for all students.	Honestly, several staff need to be looked at, Librarian, some teachers and some aids and the principal. The way that they talk to students and make arbitrary decisions and rules is something that hinders student well being and challenges the effectiveness of schooling.
How does the school prepare the middle school classes for AP classes? Has there ever been a GATE program?		How are we addressing and preventing student bullying? How are we insuring the safety of the students in the classroom and in campus? How are we addressing a positive community and dealing with the traumas our community faces. The students are unsettled and exhibiting extreme behaviors at an early age.	There is not enough community activities from the school	Students need more computer operation skills (Documents, keyboard operations, and manipulating images or graphs). The class computers get used daily so it may be helpful to make sure there is enough money to keep fixing computers that get damaged by students.	The teaches and staff need to be a more cohesive unit. The internal strife has made a toxic atmosphere for both students and adults. Perhaps a strong administrator that doesn't play favorites or isn't intimidated by some of the stronger personalities could be the answer.
teach social skills with others instead of just suspending kids or sending them to the office		No bullying no matter who their parent is.	When the bond was issued to build the Community Center, the community was promised access for events. That "access" now comes with a whole lot of regulations that make it almost impossible to use.	Allowing more access to AR at home	When will you provide professional development that updates the instructional practices of your teachers?
Tutors		The one counselor we have is doing a great job but it seems that at least two counselors full time would benefit the well-being of our students.	Host events like dances, fun runs for the whole community	Computer crimes safety	the way staff talk seems like they don't like each other very much and that they don't really like kids, either
small class sizes always benefit student learning.		Let us have fun after school activities and assemblies again.	Are you accessing local resources?	A computer lab and library that are available to students before/after school as well as recess.	
Ideas and classes for the teachers on enjoyment. The more "fun" the kids have learning, the easier they will learn.		listen to students	Answer telephone calls	After school time to do internet work because internet service as a whole is extremely unreliable in Janesville	
Not teaching the kids the same thing two years in a row in combo classes		Teachers should have more training in dealing with students that may have emotional issues.	show kids hwo to be respectful by being respectful to the kids	Teachers learning how to use technology classes.	
Our school REALLY needs to have a competent Reading Intervention teacher! Not pulled in ANY other direction or focus- Just reading intervention.		Kids need a healthy outlet to deal with daily stresses, so having a meditation room or calm room or exercise time will help them develop those healthy outlets.		One to one devices, updated instruction	
Life skills		SEL needs to be integrated into classes		Better computer systems for staff	
Teachers sometimes feel forced to "teach for the test" instead of teaching the basics that students truly need to know.		Lassen County WRAP		Up to date technology for teachers and students in the classroom	
Tutoring and more funds for supplies for teachers like PE equipment and art supplies		are their social emotional supports available to staff			
Alternative learning and hands on tools		Make behavior checks a last resort. A lot of the kids that get them get kicked off of sports or functions and this doesn't help. Find a proactive way to build respect for teachers and students, like not not punishing them if they ask why.			
No CRT, politics, or A political		Also, mental health activities for the teachers.			
Having enough teacher and staff should be evereyones top priority!		needing mental health support doenst mean that a kid is emotionally disturbed			
Teaching courses about business, finance, and software coding.					
Foreign Language					
Sports/activities					
Tutoring, 1 on 1 learning for kids who are struggling					
Have less assigned homework. This really needs serious action as well as AR reading. This makes them not enjoy reading and learn how to cheat the system. Why not book reports, they get reading and spelling in one.					
Not using only standardized tests to place kids in reading test levels and other classes					
Special ed program and kids in regular classess with aids and student involvement with the special ed kids so they develop understanding
